SUMMARY

Senior Full-Stack Developer and Tech Lead with 8+ years of experience building enterprise and industrial software solutions using Angular and .NET technologies.

Specialized in real-time systems, energy infrastructure, telemetry, and hardware-software integration. Experienced in leading projects from architecture and business analysis to deployment and long-term maintenance.

Strong background in critical infrastructure systems, distributed energy management, and custom embedded device development.

CORE SKILLS

Core Technologies

- Angular
- TypeScript
- .NET / ASP.NET Core
- C#
- MSSQL
- REST APIs
- SignalR
- Entity Framework Core
- Blazor

Cloud & Infrastructure

- Azure
- Redis
- RabbitMQ
- Git

Industrial & Embedded

- Modbus
- IEC 60870-5-104
- ARM / AVR
- LoRaWAN

EXPERIENCE

Tech Lead / Senior Full-Stack Developer

Siesta Labs | 2021 – Present

- Leading development of energy management platforms integrated with the Czech national grid operator (ČEPS)
- Responsible for system architecture, business analysis, backend and frontend development, and long-term platform maintenance
- Developed real-time telemetry and ancillary services processing systems for distributed energy resource coordination
- Designed integrations with MMS and industrial communication protocols for automated operational planning and bidding

Technologies

Angular, .NET, SignalR, MSSQL, Azure, Modbus, IEC 60870-5-104

Full-Stack Mobile Developer

IntelStudio | 2020 – 2021

- Designed and developed a mobile application for one of the largest garden equipment retailers in the Czech Republic
- Built warehouse management and sales support modules using Ionic and Angular
- Delivered the majority of the application independently, from architecture to deployment

Technologies

Ionic, Angular

Full-Stack Developer

Nakupbezpecne.cz | 2020

- Co-developed an e-commerce platform generator for small businesses during the COVID-19 pandemic
- Delivered core administration functionality within a one-week development cycle
- Implemented backend APIs and real-time communication features

Technologies

Angular, ASP.NET Core, SignalR, MSSQL

Full-Stack Developer

Adel Operations | 2019 – 2020

- Developed frontend and backend features for a cryptocurrency-based investment trading platform
- Focused on real-time user interactions and financial application workflows

Technologies

Angular, ASP.NET Core, SignalR, MSSQL

Embedded Systems Developer

UCEEB | 2017 – 2018

- Designed and developed a vibration measurement control unit using LoRaWAN communication
- Created PCB designs, firmware, and hardware communication logic for industrial monitoring

Technologies

ANSI C, ARM, LoRaWAN, Eagle

Software Developer

Siesta Solution | 2015 – 2020

- Developed and maintained hotel management software and mobile applications
- Worked on system integrations, reporting tools, and business analytics features

Technologies

C#, Angular, Entity Framework, Xamarin, NativeScript

EDUCATION

Masaryk University, Faculty of Arts

Information and Library Studies , Mgr. | 2021–2024

Czech Technical University in Prague, Faculty of Electronics

Intelligent Buildings, Ing. | 2016–2018

Brno University of Technology, Faculty of Mechanical Engineering

Applied Computer Science and Controlling, Bc. | 2013–2016

**ADDITIONAL
LEADERSHIP
EXPERIENCE**

Technical Director of the Beseda u Bigbitu music festival, responsible for technical production coordination and crew management

Previously involved in technical production and volunteer coordination for major Czech cultural events and festivals

Personal interest in embedded hardware and IoT systems using Arduino, Raspberry Pi, and ESP32 platforms

LANGUAGES

Czech - Native

English - Professional proficiency

German - Basic (A2)
